

Use this eraser together with Minato's programmer to erase large or small range of data.

EPROM Eraser EL Series

[EL-300]

- Large-size eraser that can simultaneously erase up to 352 chips (in the case of 24-pin EPROM) and 210 chips (in the case of 40-pin EPROM)
- Has large tray which accommodates 12 to 15 pieces of 4-inch wafer, or six pieces of 6-inch wafers, in addition to EPROM
- Equipped with blown-lamp indicator and radiation amount indicator that allows easy recognition of dead lamps and decreased amount of ultraviolet radiation

[EL-50]

- Medium eraser capable of simultaneously erasing up to 48 chips in the case of 32-pin EPROM

[EL-20]

- Compact eraser capable of simultaneously erasing 10 chips (in the case of 24-pin EPROM)

★ Erasing time

In the case of 16K to 4Mbit-ROM, erasure is completed in about 10 to 20 minutes. Note: time required for erasing varies depends in part on ROM use frequency.
